

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 1 – CONCEPT MAPPING

Course Code:	CSA6502	Course Title:	Generative AI and Large Scale Model
CO Assessed:	CO1-Imitation (BL3)	Assessment:	Assessment Tool 1– CONCEPT MAPPING
Weightage:	10% of CIA	Total Marks:	25
CO1 Statement:	Explain the fundamentals of Artificial Intelligence, Generative AI, Foundation Models, Transformer architecture, tokenization, embeddings, and Large Language Models.		
Student Name:	N Goutham	Reg. No.:	192472024
Section / Batch:	CSE-AI	Date:	16-07-2026

Code of Conduct

I N Goutham/192472024 (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: N Goutham

Instructions

- This assessment contains 6 questions.
- Each student assigned with two questions .
- Each question carries 10 marks. Total: 20 Marks.
- Construct concept maps clearly for each question.
- Show relationships between key concepts using arrows/links.
- Include tokens, rules, transitions, and classifications wherever required.
- Ensure clarity, structure, and logical flow in diagrams.
- Duration: 20 Minutes.

Questions	Concept Identification (25)	Linkages (25)	Organization (20)	Integration of Literature (20)	Clarity (10)	Total Marks
Overall Total (100)						

Annexure A CONCEPT MAPPING

1. A startup is developing an AI-powered healthcare assistant capable of predicting diseases, generating medical reports, and answering patient queries. Create a concept map showing how Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, and Large Language Models (LLMs) are interconnected in this application. Explain the role of each technology.

5. Create a comparative mind map illustrating the differences among AI, ML, DL, Generative AI, and LLMs based on learning approach, data requirements, computational complexity, outputs, and applications. Recommend the best technology for educational chatbots.

Rubrics for Calculation

Criteria	Weight age	Level 4 – Exemplary(90–100 Marks)	Level 3 – Proficient(75–89 Marks)	Level 2 – Developing(50–74 Marks)	Level 1 – Beginning(0–49 Marks)
Concept Identification	25%	Identifies all key concepts from literature accurately and comprehensively	Identifies most key concepts with minor omissions	Identifies limited concepts; some are irrelevant or missing	Fails to identify essential concepts
Linkages	25%	Establishes clear, meaningful, and accurate relationships between concepts	Shows correct relationships with minor gaps	Relationships are weak, unclear, or partially incorrect	No meaningful relationships established
Organization	20%	Concepts are well-structured hierarchically with logical flow and grouping	Mostly organized with minor structural issues	Some organization but lacks clear hierarchy	No logical organization or structure
Integration of Literature	20%	Integrates multiple studies effectively to show connections and comparisons	Shows some integration of literature	Limited integration; mostly isolated concepts	No integration of literature evidence
Clarity	10%	Concept map is clear, neat, visually structured, and easy to interpret	Generally clear with minor readability issues	Clarity is reduced; difficult to interpret in parts	Poorly presented and hard to understand
